CASE STUDY · AI TASK LINE

REAL ESTATE CERTIFICATION · FRANCE

202 Tasks Completed Ahead of Go-Live

AI agents write the code; the Doodex team tests and validates every result.

TASKS DELIVERED
202
23 Oct – 18 Nov 2026

CODE BY AI AGENTS
100%
since 23 October 2026

3.1 days	55	35–55	401
median from request to done	tasks delivered in the busiest full week	tasks delivered per week	tasks created in this period

01 · THE CLIENT'S CHALLENGE

A growing list of system changes

- Information was hard to find
- Same documents requested again
- Deadlines were missed
- Company knowledge at risk

FROM OUR PROJECT MANAGER

"Code gets written faster and review runs automatically. Human validation is still essential for the decisions AI can't make on its own."

PM — **Project Manager**, Doodex

02 · REAL TASKS

Four Tasks From the AI Task Line

TIME	THE REQUEST	WHAT WAS DELIVERED
2.1 days	Hide the edit (pen) icon on fields the user is not allowed to change.	The pen now shows only where the user can really edit, on every screen of the internal platform.
2.4 days	Let every user edit someone else's activity, but not delete it.	Any user can change an activity's date, notes and assignee; deleting stays blocked. After a due-date change, the activity stays in the planned list.
6.2 days	Tell apart an e-mail still to send from an e-mail already sent.	Two different icons on every screen: activity list, file history, timeline and home page.
2.5 days	Use the same contact and address fields on every online form.	All forms share the same layout. Company details show only when the applicant is a company, and the postcode sits between the street and the city.

Client requests rewritten in plain words. Time = from task created to first done.

Need a team to guide the development of your business system?

The Doodex team understands your business needs, gives recommendations, and supports the development of your system from consulting to support after go-live. With the AI Task Line, our team can manage the work and speed up development in a more structured way.
